

PAMPANA SIVA SURYA RAM GOPAL

Software Engineer

Email: ramgopalpampana10@gmail.com | Phone: +91-7730072669

Location: Bengaluru, Karnataka, India

Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Test Engineer and Full-Stack Developer with expertise in automated testing, AI solutions, and modern web development. Proficient in Java, Python, JavaScript, Selenium, and TestNG. CCNA certified with experience in Azure OpenAI, Google Cloud, and React. Currently learning LangChain and LangGraph for advanced AI applications. Impact highlights: Achieved 95% accuracy in AI chatbot, reduced testing errors by 25%, and improved performance by 40% through automation and optimization.

TECHNICAL SKILLS

Programming Languages:

Java, Python, JavaScript, HTML5, CSS3

Testing & Automation:

Selenium WebDriver, Pytest, TestNG, JUnit, Automated Testing

Web Technologies:

React, Django, REST APIs

Cloud & AI Technologies:

AWS, Azure OpenAI, GPT-4, Azure AI Search, Generative AI

Data Science:

Generative AI, Machine Learning, Data Analysis, LangChain, LangGraph

Databases & Tools:

MySQL, Azure Cosmos DB, Git, VSCode, PyCharm, GitHub Copilot, Postman

Networking:

CCNA Certified, TCP/IP, Network Protocols, Network Troubleshooting

PROFESSIONAL EXPERIENCE

Software Test Engineer Trainee

November 2024 - Present

Cisco Systems

Bengaluru, India

- Automated testing using Python with Selenium and Pytest to ensure software quality
- Developing a full-stack AI chatbot using Azure OpenAI, Django, MySQL, and Azure AI Search for real-time natural language query handling
- Integrating Azure AI Search for intelligent schema retrieval and dynamic SQL generation
- CCNA Certified: Proficient in networking, routing, switching, and IP fundamentals

KEY PROJECTS

AI-Powered Chatbot for Infrastructure Management (Cisco, 2024 – Ongoing)

Ongoing

- Contributing to a custom AI chatbot integrated into an infrastructure management tool built on Django and MySQL.
- Implementing Azure OpenAI (GPT-4) for natural language understanding and automated query responses.
- Working on integration with Cosmos DB, Azure AI Search, Blob Storage, and AI Language for intelligent retrieval, secure data handling, and NLP-based intent detection.
- Integrated comprehensive Azure services: Cosmos DB for data storage, Blob Storage for file handling, AI Search for intelligent retrieval, AI Language for NLP-based intent detection, and VNet for secure network access.

Network-Based Pattern Searching System (Academic)

2024

- Developed a **Network-Based Pattern Searching** project with **client-server architecture** to search for words in a file.
- Implemented **client-server communication** using **JSON requests** to query and return matching lines with line numbers.
- Designed a **Search class** to read, clean, and search file content efficiently, handling errors like "File Not Found."

Self-Fuel Dispensing Automated Framework Using RFID Cards (Academic)

2023

- Developed and implemented an RFID-based self-fuel dispensing system, reducing operational errors and unauthorized access by 25%.
- Optimized transaction efficiency by 40%, improving accuracy and user satisfaction through advanced algorithms and real-time data processing.

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering

August 2019 - June 2023

Pragati Engineering College

Kakinada, Andhra Pradesh, India

- CGPA: 7.87/10.0

CERTIFICATIONS & TRAINING

- Data Science Certification** – Cisco Systems (2025) - Generative AI Green Belt Program
- Cisco Certified DevNet Associate** – Cisco Systems (2023)
- CCNA** – Cisco Systems (2024)
- Python Programming** – NPTEL (2024)
- Python (Basic)** – HackerRank (2024)
- Automation Testing** – Test Automation Training (2024)

ADDITIONAL INFORMATION

- Interests:** AI/ML Technologies, Test Automation, Full-Stack Development, Cloud Computing
