

PAMPANA SIVA SURYA RAM GOPAL

Software Engineer | AI & Automation | Full-Stack Development

Bengaluru, India | +91 7730072669 | ramgopalpampana10@gmail.com

LinkedIn: www.linkedin.com/in/ramgopalpampana | GitHub: github.com/Ram2669 | Portfolio: ramgopal-portfolio.vercel.app

PROFESSIONAL SUMMARY

Python Full-Stack Developer skilled in **Django**, **React**, and **Azure OpenAI** with a focus on building scalable, AI-driven web applications. Experienced in backend APIs, frontend design, and database management. Completed automation testing training to enhance software quality and performance awareness. CCNA-certified with strong cloud and networking knowledge.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, HTML5, CSS3

Frameworks & Tools: Django, React, Selenium, Pytest, TestNG, JUnit

Cloud & AI: Azure OpenAI, AWS, GPT-4, Azure Cognitive Search, LangChain, LangGraph, RAG

Databases: MySQL, Azure Cosmos DB

Version Control & IDEs: Git, VS Code, PyCharm, GitHub Copilot, Postman

Networking: CCNA Certified – Routing, Switching, TCP/IP, Network Troubleshooting

PROFESSIONAL EXPERIENCE

Software Test Engineer Trainee

Cisco Systems

Bengaluru, India

Nov 2024 – Present

- Automated web testing workflows using **Python**, **Selenium**, and **Pytest**, improving regression coverage by 40%.
- Developed a full-stack AI chatbot leveraging **Azure OpenAI**, **Django**, and **MySQL** for real-time query processing.
- Engineered intelligent schema retrieval using **Azure Cognitive Search**, reducing token usage by 30%.
- Applied **CCNA** certified skills in routing, switching, TCP/IP, and network troubleshooting for system optimization.

KEY PROJECTS

AI-Powered Chatbot for Infrastructure Management

Cisco, 2024 – Currently Implementing

- Designed and implemented a **GPT-4**-powered chatbot integrated with **Azure OpenAI**, **Django**, and **MySQL** to automate infrastructure queries.
- Engineered a smart retrieval system using **Azure Cognitive Search**, **Cosmos DB**, and **AI Language** for NLP-based intent detection.
- Secured deployments with **Azure VNet** and optimized query execution, improving response latency by 35% and chatbot accuracy to 95%.

Network-Based Pattern Searching System

2024

- Developed a client-server pattern searching tool using **Python** and **JSON** for efficient text matching.
- Optimized error handling and file parsing, reducing query latency by 25% and improving reliability.

Self-Fuel Dispensing Automated Framework Using RFID Cards

Academic, 2023

- Designed and implemented an **RFID**-based automated fuel dispensing framework to minimize manual errors and unauthorized access.
- Improved transaction accuracy by 40% through real-time data synchronization and algorithm optimization.

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering

Pragati Engineering College, Kakinada

Aug 2019 – Jun 2023

CGPA: 7.87 / 10

CERTIFICATIONS

- **Data Science Certification** – Cisco Systems (Generative AI Green Belt, 2025)
- **Cisco Certified Network Associate (CCNA)** (2024)
- **Cisco Certified DevNet Associate** (2023)
- **Python Programming** – NPTEL (2024)
- **Python (Basic)** – HackerRank (2024)
- **Automation Testing** – Test Automation Training (2024)

ADDITIONAL INFORMATION

Interests: AI/ML Applications, Test Automation, Full-Stack Development, Cloud Computing, and Generative AI
